[Usr Local Bin Virtualenvwrapper.sh No Such File Or Directory](#)

From my experience, following the instructions on some sites will land you in problem.

1. [bash /usr/local/bin/virtualenvwrapper.sh no such file or directory](#)
2. [error /usr/local/bin/virtualenvwrapper.sh no such file or directory](#)
3. [.local/bin/virtualenvwrapper.sh no such file or directory](#)

3 2 Location: /home/mukesh/ local/lib/python2 7/site-packages Requires: virtualenv, virtualenv-clone, stevedore I made two directories '.. I have installed virtualenv using pip command: $ pip install -user virtualenv and virtualenvwrapper $ pip install -user virtualenvwrapper everything worked fine: $ pip show virtualenvwrapper Name: virtualenvwrapper Version: 4.

bash /usr/local/bin/virtualenvwrapper.sh no such file or directory

bash /usr/local/bin/virtualenvwrapper.sh no such file or directory, no such file or directory /usr/local/bin/virtualenvwrapper.sh, error /usr/local/bin/virtualenvwrapper.sh no such file or directory, bash /root/.local/bin/virtualenvwrapper.sh no such file or directory, .local/bin/virtualenvwrapper.sh no such file or directory [Xilisoft Registration Key](#)

bashrc When I am trying to make a new virtual environment by using following command: $ mkvirtualenv testenv01 I am getting error: ERROR: virtualenvwrapper could not find virtualenv in your path Don't know what should I do now.. You have a mix of pythons on your machine I would stick to one. sh now that's not gonna work for you especially now with 16 04 comes with virtualenv as one of her packages.. local/bin/virtualenvwrapper sh After saving the changes, I sourced the file to make the changes active: $ source /.
